

# Paving the Way to Climate Justice

**11 December 2020**  
2 pm to 6 pm CET (UTC+1)

## Free virtual conference on:

Climate change particularly affects those who have been historically marginalised: women, people of colour, indigenous groups and economically weak countries of the Global South. The concept of climate justice addresses not only environmental aspects, but above all ethical and political aspects of climate change. Coined as a term twenty years ago, an international movement has since emerged to implement concrete progress in this area and to create a binding legal basis for climate justice.

The online workshop will take up this topic from a historical perspective and present successful international initiatives that are already contributing to climate justice.

## Speakers Include:

- ▶ **Climate Justice – Making the Impossible Possible: A Historical Perspective**  
Carol Haynes and Christoph Sodemann, Communication/Journalism Experts and Co-Founders of [constructify.media](https://www.constructify.media), Bremen, Germany
- ▶ **Making Mobility Work for Adaption to Environmental Changes**  
Dr Andrea Milan, Global Migration Data Analysis Centre International Organization for Migration, Berlin, Germany
- ▶ **Making Circular Economy Inclusive in Green India Mission: A Strategy to Address Climate Injustice**  
Dr Prasad Modak, Executive President, Environmental Management Centre LLP Director, Ekonnnect Knowledge Foundation, Mumbai, India
- ▶ **How women are particularly affected by climate change – Experiences from South Africa**  
Prof Rozena Maart, University of KwaZulu Natal, Durban, South Africa
- ▶ **Green is the New Finance – How to mobilise private capital for an inclusive, climate-resilient global economy**  
Helen Avery, Green Finance Institute, UK, Editor at EuroMoney

ticks differently. We know and name crises and conflicts. But we do not stop at analysing the status quo. We also ask questions about the future. Where are the solutions for a problem? Who are the actors seeking those solutions – and implementing them?

Climate change and environmental degradation demand answers – for the survival of mankind and the well-being of the earth. Journalists and the media have a responsibility to ask for these answers, and to show what needs to be done and what is feasible to do.
